

Addendum 2

RFB TDD 78-16 Okaloosa Artificial Reef Construction Project

The purpose of this addendum is to add photos of the artificial reef inventory.

Also, the timeframe to complete work will be extended for another 90 days, which will be around the end of March 2017. The FWC is working on the paper to extend the grant now and the actual date will be added to the file once it has been officially extended.
