Solutions for Proper Disposal of Hazardous Waste

Many seemingly harmless household activities, such as dumping yard waste, or draining chlorinated **swimming pool** water and household waste water from washing machines, dishwashers or water softening devices into ditches, storm drains and canals are also classified as **illicit discharges**. Below are a few solutions for proper disposal.

- **Pools** contain chlorine. Drain PH neutral Swimming Pool water with no traces of chemicals across the lawn instead of in the Storm Drain.
- **Leaves** and **grass** clippings clog storm drains and increase nutrient levels in waterways.
- **Chemicals** should always be recycled.
- **Washing cars** on grass eliminates runoff.
- **Oil** should always be recycled.
- **Roof drains** should flow in yard over grass.

HAZARDOUS WASTE

In an effort to divert hazardous waste from local landfills Okaloosa County accepts a variety of household hazardous waste. For more information please refer to the numbers listed below.

Okaloosa County
Hazardous Waste Facility
Fort Walton Beach, FL 32548
(850) 301-2013

Recycling Coordinator – (850) 651-7394
