ADA Transition Plan Update
February 20, 2024

1.0 Introduction

1.1 Legislative Mandate

The Americans with Disabilities Act (ADA) is a civil rights law that mandates equal opportunity for individuals with disabilities. The ADA was originally passed in 1990 and prohibits discrimination and ensures equal opportunity for persons with disabilities in employment, state and local government services, public accommodations, commercial facilities, and transportation. The ADA was revised by the ADA Amendments Act of 2008 which became effective on January 1, 2009. On September 15, 2010, the United States Department of Justice (DOJ) published final regulations revising the original ADA regulations, including the adoption of updated ADA Standards for Accessible Design (ADA 2010 Standards).

Title II of the ADA also requires that all programs, services, and activities (PSAs) of public entities provide equal access for individuals with disabilities. Okaloosa County has undertaken a comprehensive evaluation of its transition and facilities, including sidewalks, to determine the extent to which individuals with disabilities may be restricted in their access.

1.2 ADA Self-Evaluation and Transition Plan Development Requirements and Process

Okaloosa County is obligated to observe all requirements of Title I in its employment practices; Title II in its programs, services, and activities; any parts of Titles IV and V that apply to the County and its programs, services, or facilities; and all requirements specified in the 2010 ADA Standards and 2011 Proposed Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way (PROWAG) that apply to facilities and other physical holdings.

Title II has the broadest impact on the County. Included in Title II are administrative requirements for all government entities employing more than 50 people. These administrative requirements are:

- Completion of a Self-Evaluation;
- Development of an ADA complaint procedure;
- Designation of at least one person who is responsible for overseeing Title II compliance; and
- Development of a Transition Plan to schedule the removal of the barriers uncovered by the Self-Evaluation process. The Transition Plan is a working document until all barriers have been addressed.

Okaloosa County is updating the ADA transition plan to include all infrastructure described in section 1.3. This document describes the process developed to complete the evaluation of select Okaloosa County PSAs and facilities, provides recommendations to remove programmatic barriers, and presents a Transition Plan for the modification of facilities within the public rights-of way to improve accessibility, which will guide the planning and implementation of necessary program and facility modifications. The ADA Self-Evaluation and Transition Plan is significant in that it establishes the County's ongoing commitment to the development and maintenance of PSAs and facilities that accommodate all of its citizens.

1.3 Discrimination and Accessibility

Program accessibility means that, when viewed in its entirety, each program is readily accessible to and usable by individuals with disabilities. Program accessibility is necessary not only for individuals with mobility needs, but also to individuals with sensory and cognitive disabilities.

Accessibility applies to all aspects of a program or service, including but not limited to physical access, advertisement, orientation, eligibility, participation, testing or evaluation, provision of auxiliary aids, transportation, policies, and communication.

The following are examples of elements that should be evaluated for barriers to accessibility:

1.3.1 Physical Barriers

- Parking
- Path of travel to, throughout and between buildings and amenities
- Doors
- Service counters
- Restrooms
- Drinking fountains
- Public telephones
- Path of travel along sidewalk corridors within the public rights-of-way
- Access to pedestrian equipment at signalized intersections

1.3.2 Programmatic Barriers

- Building signage
- Customer communication and interaction
- Non-compliant sidewalks or curb ramps
- Emergency notifications, alarms, and visible signals
- Participation opportunities for County sponsored events

1.4 Ongoing Accessibility Improvements

The ADA Coordinator for Okaloosa County is Kelly Bird; Who may be reached at 850-689-5874. The ADA Coordinator is responsible for compliance and implementation of this Transition Plan.

County PSAs and facilities evaluated during the Self-Evaluation will continue to be evaluated on an ongoing basis, and the ADA Transition Plan should be revised to account for changes since the initial Self-Evaluation. This Plan will be available for review and consideration by the public. In addition, notice will be provided of the Plan's existence in any official and unofficial County publications.

1.5 Okaloosa County Approach

The purpose of the Transition Plan is to provide the framework for achieving equal access to the Okaloosa County's programs, services, activities, and facilities within a reasonable timeframe. The County's elected officials and staff believe accommodating people with disabilities is essential to good customer service, the quality of life Okaloosa County residents seek to enjoy, and to provide effective governance. This Plan has been prepared after careful evaluation of select County programs, services, activities, and facilities.

Okaloosa County shall make reasonable modifications in PSAs when the modifications are necessary to avoid discrimination based on disability, unless the County can demonstrate that making the modifications would fundamentally alter the nature of the program, service, or activity. The Okaloosa County will not place surcharges on individuals with disabilities to cover the cost involved in making PSAs accessible.

2.0 Self-Evaluation and Summary of Findings

2.0 Grievance Procedure and Grievance Form

Local governments with 50 or more employees are required to adopt and publish grievance procedures for Title II complaints. A grievance form is not required by the Department of Justice, but a form can be an effective tool to aid in the collection of information needed to address a complaint. Title II does not specify what must be included in a grievance procedure, but the Department of Justice has developed a model grievance procedure that can be used as a starting point. Per the Department of Justice, the grievance procedure should include the following elements:

- A description of how and where a complaint under Title II may be filed with the government entity;
- If a written complaint is required, a statement notifying potential complainants that alternative means of filing will be available to people with disabilities who require such an alternative;
- A description of the time frames and processes to be followed by the complainant and the government entity;
- Information on how to appeal an adverse decision; and
- A statement of how long complaint files will be retained.

2.1 Buildings and Sidewalk Review

In 2018, Okaloosa County updated the buildings checklist and In 2024, conducted a complete inventory of sidewalk corridors to provide the County with an overview of the physical barriers that prevent people with disabilities from using its facilities.

The infrastructure evaluation process was accomplished using aerial mapping supplemented with field checks of buildings, signals, and sidewalks.

Summary tables, as shown in the appendix, were developed for buildings and for sidewalks to document the findings of the evaluations.

2.1.1 Signalized Intersections

The County maintains 134 signals for Local Governments and FDOT within Okaloosa County. However, only 7 of the signals are on Okaloosa County owned roadways. Of the 7 signals, two have sidewalks and crosswalks adjacent to the signals. The sidewalks and ramps are inventoried in section 3.4.3. None of the pedestrian signal infrastructure contains ADA enhanced features such as voice notification of walk and countdown timings, or vibratory tactile push buttons.

ADA enhanced features may be added to signalized intersections upon request from a Citizen needing accommodation, or when the signal is reconstructed.

2.1.2 Buildings

The County maintains over 2 Million square feet of buildings including major facilities such as the Okaloosa County Courthouse and minor facilities such as restrooms at Beach access ways. Each year a budget is prepared to reconstruct or renovate buildings to improve the purpose of the building and to ensure accessibility.

ADA compliant features are added during reconstruction by following the Florida Building Code. ADA compliant features are also included in renovations. Appendix A includes the transition plan for building facilities.

Self-Evaluation Findings

Common ADA issues included handrail elevations, parking space sizes and assessable markings, bathroom stall size, and ramps too steep. These items are corrected through renovation in the Capital Improvement Plan (CIP). The CIP can be found at:
http://www.co.okaloosa.fl.us/sites/default/files/users/bccuser/CAPITAL%20IMPROVEMENT%20PLAN_ADA.pdf

2.1.3 Sidewalk Corridors

Okaloosa County maintains over 943 miles of roadway. Most of these roads are rural in nature and do not have sidewalks. There is room for 1,866 miles of sidewalk along County Roads if sidewalks were placed on both sides of each maintained road; however, there are only 80 miles of sidewalk currently in place. This means that only 5% of the potential sidewalk length has been constructed along County maintained roads in Okaloosa County.

The sidewalk corridor evaluations documented conditions and measurements along the pedestrian path of travel, which includes the sidewalk, curb ramps, pedestrian crossings at driveway openings, and pedestrian crossings at intersections. A list of sidewalk locations and ADA compliance state is shown in Appendix B. All new sidewalks are constructed in compliance with ADA laws.

Self-Evaluation Findings

Common issues along the sidewalk corridors included excessive sidewalk cross slopes, vertical surface discontinuities that caused excessive level changes, excessive driveway and cross street cross slopes, permanent obstructions in the sidewalk such as power poles or utilities, and temporary obstructions in the sidewalk or path of travel such as weeds and low hanging branches. Common curb ramp issues at intersections along the sidewalk corridors included non-flush transitions from ramp to roadway, excessive flare cross slopes, excessive curb ramp cross slopes, and excessive landing cross slopes. Non-compliant curb ramps are upgraded with any roadway alteration project. Alteration projects are defined in section 2.2. Okaloosa County anticipates altering all roadways with sidewalks within the next 30 years. Roadways are evaluated each year and a resurfacing plan is developed and presented to the Public for review, modification, and acceptance by the Board of County Commissioners. Sidewalk ramps along resurfaced roadways are brought up to ADA standard during roadway overlays and microsurfacing. Ramps may also be corrected upon request from a Citizen needing accommodation.

2.2 Maintenance versus Alterations

The United States Department of Justice (DOJ) has issued a briefing memorandum on clarification of maintenance versus projects. Information contained in the briefing memorandum is below.

The Americans with Disabilities Act of 1990 (ADA) is a civil rights statute prohibiting discrimination against persons with disabilities in all aspects of life, including transportation, based on regulations promulgated by the United States Department of Justice (DOJ). DOJ's regulations require accessible planning, design, and construction to integrate people with disabilities into main stream society. Further, these laws require that public entities responsible for operating and maintaining the public rights-of-way do not discriminate in their programs and activities against persons with disabilities. FHWA's ADA program implements the DOJ regulations through delegated authority to ensure that pedestrians with disabilities have the opportunity to use the transportation system's pedestrian facilities in an accessible and safe manner.

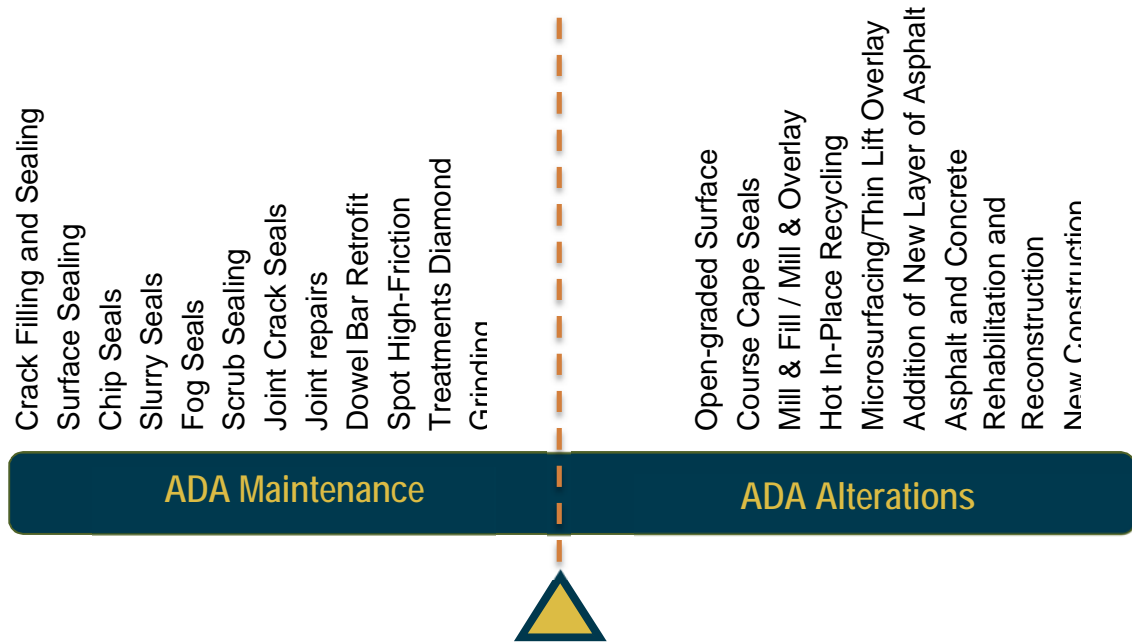

FHWA and DOJ met in March 2012 and March 2013 to clarify guidance on the ADA's requirements for constructing curb ramps on resurfacing projects. Projects deemed to be alterations must include curb ramps within the scope of the project.

This clarification provides a single Federal policy that identifies specific asphalt and concrete-pavement repair treatments that are considered to be alterations – requiring installation of curb ramps within the scope of the project – and those that are considered to be maintenance, which do not require curb ramps

at the time of the improvement. **Figure 1** provides a summary of the types of projects that fall within maintenance versus alterations.

This approach clearly identifies the types of structural treatments that both DOJ and FHWA agree require curb ramps (when there is a pedestrian walkway with a prepared surface for pedestrian use and a curb, elevation, or other barrier between the street and the walkway) and furthers the goal of the ADA to provide increased accessibility to the public right-of-way for persons with disabilities. This single Federal policy will provide for increased consistency and improved enforcement.

3.1 Next Steps

This document serves as the Americans with Disabilities Act (ADA) Transition Plan within Okaloosa County. In developing this Plan, program, policies and procedures were reviewed for compliance with ADA guidelines and a Self-Evaluation was conducted on the following:

- 7 signalized intersections,
- 2 million square feet of buildings, including parking lots, and
- 80 miles of sidewalk.

Buildings are improved each year through the Capital Improvement Plan. Appendix A shows the current list of proposed and past ADA improvements.

Each year, roadways are evaluated and a list of roadways to receive overlays and microsurfacing is developed. The preliminary 2024 list of roadways is presented in Appendix C. This transition plan calls for sidewalk ramps along these roadways to be upgraded to be compliant concurrent with the overlay or microsurfacing.

As funding becomes available, additional facility evaluations and review of all County programs, services, and activities will be completed to provide a comprehensive Transition Plan for the Okaloosa County.
